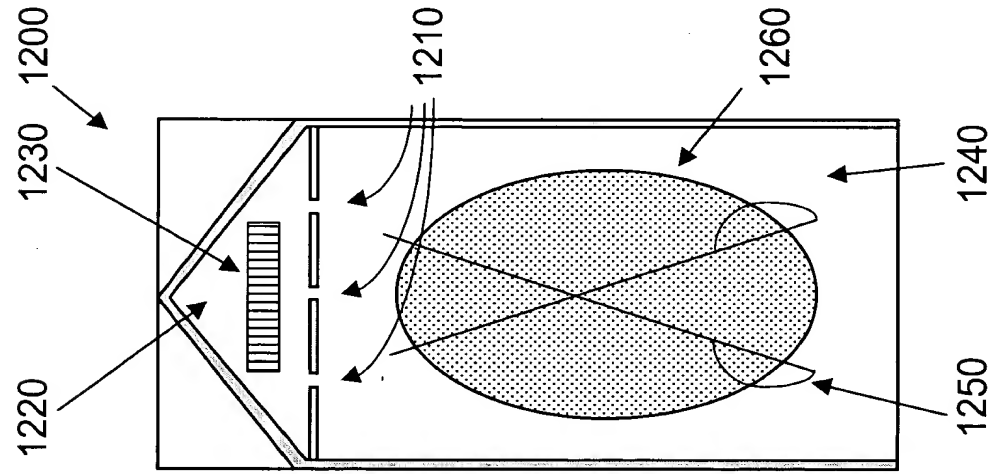

Figure 21

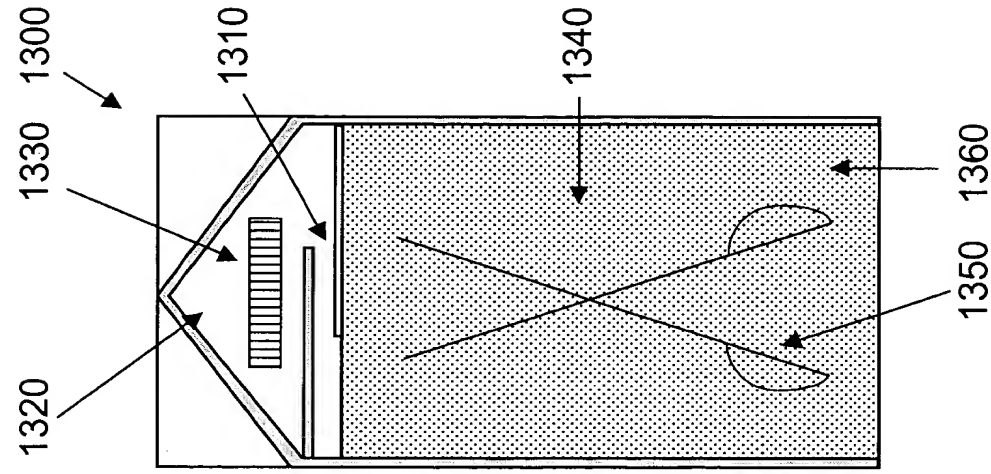

FIG. 22 is a schematic diagram of a system for providing a user with a personalized view of a document. The system includes a user interface (1400) that displays a document (1410) and a set of controls (1420) for navigating through the document. The controls include a set of buttons (1430) for navigating between pages and a set of buttons (1440) for navigating between sections of the document. The system also includes a set of buttons (1450) for navigating between different views of the document.
